

CORPORATE OVERVIEW

Summit Liability Solutions is Western Canada's leading environmental service provider. Offering turnkey liability management solutions, Summit focuses on regulatory compliance when delivering cost effective liability management solutions. Built by diversified, knowledgeable and experienced professionals, Summit was created on the foundation of providing **'environmental liability management solutions with integrity'**.

SUMMIT SERVICES

Summit delivers integrated liability management solutions executed through technical and regulatory expertise in the following fields:

- Reclamation and Remediation Services
- Pre-Drilling Environmental Assessments
- Drilling Waste Management Services
- Spill Clean Up Services
- Pre-Acquisition & Divesture Evaluation Services (A&D)

WHERE WE ARE LOCATED

Summit is strategically located in key service areas utilizing a combination of employee and contract field staff to meet our clients' needs and provide a localized service. Currently we have operations centers and/or senior management located in the following areas to support our technicians and the services we provide across Western Canada:

- Calgary
- South East Saskatchewan
- Grande Prairie
- NE British Columbia
- Swift Current
- Lloydminster

HEALTH, SAFETY & ENVIRONMENT

Summit is committed to promoting Health, Safety and Environmental policies at every level. Our commitment and dedication can be measured as follows:

- Certificate of Recognition (COR) since inception
- Third party review and audits of HSE policies and practices
- Excellent WCB rating and no loss time incidents to date
- Extensive Health, Safety and Environment Program
- Enrollment into accredited contractor/vendor management programs:

These programs track compliance and inform our clients of our HSE policies and current safety statistics

MISSION STATEMENT

Summit's mission is to provide our customers with industry leading environmental liability management solutions built on trust, integrity, successful execution and continuous improvement. Utilizing these principles, our involvement in the regulatory process and placing health, safety and the environment first, Summit will deliver cost effective solutions and strive to surpass our customers' needs and expectations.

SUMMIT UNIVERSITY

Summit believes continuous training and education of field and office staff is imperative to continued success and improvement. Annually we provide extensive training to educate our personnel on the services we provide, regulatory changes, technological advancements, updated HSE policies and client-specific topics. Summit University has been very successful and the ever-evolving curriculum is invaluable towards ensuring we have the best field and office personnel available.

QA/QC PROGRAM

In conjunction with our HSE policies, Summit has developed an extensive QA/QC program with service specific procedures and auditing processes. Our University of Summit and compliance management system, Summit Earth™, further support our QA/QC program. Implementation and execution of these protocols ensure our service commitments and quality work, from the field through to the office, are delivered to our customer.

COMPLIANCE MANAGEMENT SYSTEM – SUMMIT EARTH™

Summit, in conjunction with a geomatics and programming firm, has developed a compliance management system benefiting our clients on many levels. A powerful tool for field and administrative staff, this system has been created to

enhance our capabilities and create efficiencies while driving compliance for our customers. A live demonstration of this program's capabilities is available upon request. Some of the system's advantages are:

Searchable data base

Secure data storage

Powerful mapping tools

Satellite imagery

Pipeline identification

Self-checking reporting system

Real time data entry accessible by client

Improved efficiencies

Mitigates clerical mistakes and human error

Improved report quality

SUMMIT ADVANTAGE
